Paper presented at the World Conference on Research Integrity
May 30, 2017, Amsterdam, NL.
Definition: Vanity Conferences in Education

Brooks (2009) identified various characteristics of questionable academic conferences:

• Combinations of broad conference subject fields that include proposal submission categories for research
• Calls for Proposals guarantee paper publication with presentation proposal submission
• Conference registration fee must be paid for a paper to be published in conference proceedings.
• Conference registration, paper presentation and publication are combined in one fee.
• Additional fees for multiple presentation proposals
• The organization convenes several conferences each year on a range of academic disciplines.
Research Questions

Two research questions guided this study:

1. What demographic characteristics (number of authors, employing institutional types, faculty rank or administrator title) characterize publication patterns in proceedings of international conferences similar to characteristics of vanity conferences?

2. What are the primary methodological approaches used in research publication proceedings similar to characteristics of vanity conferences?

Abstract question: What are implications of publications resulting from international education research conferences similar to characteristics of vanity conferences for the quality of academic staff productivity and education research?

Vander Putten
2017 World Conference on Research Integrity
Methodology

- Collected random samples of 10 conference proceedings publications on various topics in the field of Education from each of 17 conferences with characteristics similar to vanity conferences (N=170)

- Descriptive data analyses on author demographics:
  - faculty academic disciplines, ranks, and countries
  - administrator titles or work units
  - proceedings publication title
  - research methods employed
Presentation and Publication Patterns in International Vanity Conferences in Education

RESULTS

Number of conference publications analyzed  N=170
Number of conference publications authors  N=264
Average number of authors per publication  N=1.76

Institutional control of authors’ affiliations:
Public control  90%
Private  10%

Institutional location of authors’ affiliations:
U.S.  29%
Other countries (AU, TK, SLO, SAU, GDR)  71%
Presentation and Publication Patterns in International Vanity Conferences in Education

RESULTS

Faculty conference publication authors  89%  N=235

Academic ranks of faculty conference publication authors:

</table>
Results
Administrator conference publication authors 11% N= 21
Organizational units of administrator conference publication authors:
Academic Dean 2.3% N=7
Student Affairs 2.3% N=7
K12 Educational Technology Coordinators 2.3% N=7
Independent Researcher Authors 3% N=8

Research methods used in research conference proceedings publications:
Quantitative methods 29% N=43
Qualitative methods 0% N=0
Mixed methods 1% N=1
Academic Essay 71% N=106
Presentation and Publication Patterns in International Vanity Conferences in Education

CONCLUSIONS:

• Academic staff cultural capital and socialization
• Presentations and proceedings publications bolster their annual review and tenure files, salaries
• Institutions have already provided implicit financial support to the sponsoring organizations
• Wide range of Education-related topical areas eligible for vanity conference proposal submission.
Is this the future of Vanity Research Conference Proceedings?
